the sweetseat

This swing can be used indoors or outdoors, for children from 6 months old (or when sitting up alone) until around 5 years (or about 60 lbs). All you need is a strong beam or tree branch from which to hang it. Please make sure to use the cushion for back support for the little ones. Swing should be checked for safety prior to each use, and should always be used under adult supervision

Hanging Instructions

This swing can be suspended from a tree using additional rope (not supplied) or mounted to a beam and secured with a hook (not supplied). Please make sure you install it safely, and you check the structure from which you hang it for rot or instability. If purchasing a hook or bracket, make sure it is weight-bearing, and is screwed fully into the support with no thread showing. You can hang it at any height, the more rope above the ring the greater the swing arc. For indoor use, it can also be hung from a ceiling beam using an eye bolt (not supplied).

When using the swing, IT IS IMPERATIVE that you check and double check the swing and knots every time you use it, as well as the structure from which it hangs. Safety first, please make sure that each branch, beam, or other structure that you hang your swing from has no rot or deterioration before placing your child in the swing. Never leave your child unattended.

Care Instructions

The wood is untreated and should be kept dry, the canvas should be kept clean by dry brushing or, you can sponge wash with a mild detergent, but avoid harsh scrubbing as this will damage the fabric. Your swing should be kept out of harsh elements. Please bring it inside during wet or windy weather and do not leave it outside during the winter. If needed, it can be handwashed (tub soak) and hung to dry, but never place your swing in a washer or dryer and please check all knots and components prior to re-hanging to ensure everything is secure.
